

CONTENTS

Development of a Human-Robot Interaction System for Industrial Applications	1-10
Vision Transformer Based Photo Capturing System	11-17
African Vultures Optimization Algorithm-Based Selective Harmonic Elimination for Multi-level Inverter	18-30
A Real-time Face Recognition Based on MobileNetV2 Model	31-39
Designing Effective Models for COVID-19 Diagnosis through Transfer Learning and Interlayer Visualization	40-46
Intelligent Video Surveillance Systems: A Survey	47-51
